Mr D. Wozny,
6 Wadham Street
Penkull
STOKE-ON-TRENT
Staffs
ST4 7HF

Dear David,

HP have passed on to me your letter dated 5th March '88 asking for details of the Tim Friesner Award, and have asked me to reply.

Tim Friesner was for many years a loyal member of the Stoke-on-Trent Section Committee of the I. Prod. E., holding many of its official offices. His working career was with Rolls Royce Motors at Crewe where he held senior appointments in production and quality.

Unfortunately, he passed away quite suddenly some eighteen months ago and the Section thought it appropriate to honour his contribution to the field of production engineering by sponsoring an annual,

named prize at the Stoke-on-Trent Technical College.

The actual administration and selection of the award winner is done 100% by the staff of the Technical College. The basic criteria is that the prize is awarded to the best improved student in the field of production engineering or a related discipline. If you have any further questions relating to the selection criteria, may I suggest that you approach the college directly.

To confirm our telephone conversation the other day, the purpose of taking your photograph was to send it to HQ for publication in our Journal, 'Production Engineer'. I have still not received the photographs from the College, so realistically speaking, I can't see it being published before June/July. When it is published, I am sure that the College will let you see it.

Hopefully you are still interested in joining the section as a Student Member, in which case you need to write to HQ for the relevant application form. I hope that this letter has answered your questions, if not, please contact me.

Yours sincerely, Dave Tovey (SECTION HON. SECRETARY)
